

miraDry[®]

**SWEAT
STOPS
HERE[™]**

PERMANENTLY REDUCE UNDERARM
SWEAT, ODOR AND HAIR^{1,2}

CONSULTATION GUIDE

EVERYONE SWEATS

For some, sweating is excessive

For others, sweating and odor are simply a bother – managed daily with antiperspirant and deodorant

SWEAT FACTS

ANATOMY OF SWEAT AND ODOR GLANDS

DO I NEED UNDERARM SWEAT?

While your body does need sweat glands to cool itself, **your body contains 2-4 million sweat glands.** Only about 2% are found in your underarms.

Eliminating this 2% of sweat glands does not affect your body's ability to cool itself.

HOW MIRADRY WORKS

miraDry delivers targeted thermal energy to safely eliminate sweat, odor, and hair.^{1,2}

HOW MIRADRY WORKS

A COMFORTABLE 1-HOUR TREATMENT

1. Numb treatment area

IMPORTANT SAFETY INFORMATION

The miraDry treatment is not for you if you have or need the following:

- Heart pacemakers and other electronic device implants.
- Supplemental oxygen.
- Known resistance to or history of intolerance of local anesthesia including lidocaine and epinephrine.

Use caution before undergoing the miraDry treatment under the following conditions, the effects of which have not been studied:

- Pregnancy
- Underlying skin conditions
- Previous axillary surgery

COMMON AND RARE SIDE EFFECTS

The following effects can occur during and after a miraDry treatment. In most cases, these side effects will gradually go away. In rare cases, it can last for several months.

DURING A TREATMENT

- Due to the anesthesia, you may experience bruising at the injection site. You may also experience shaking, numbness or tingling in the arm, lasting less than 24 hours.

IMMEDIATELY AFTER A TREATMENT

- Swelling, redness, temporary altered sensation, tingling, soreness, weakness, tight banding, pain, or bumps under the skin in the treated area and/or upper arm.
- Discomfort, tenderness or pain in the underarm is typically treatable with non-prescription medications such as ibuprofen. In rare cases, prescription medications may be needed.

RARE SIDE EFFECTS

- Hyperpigmentation (darkening of skin), burns, skin infections, rashes, and altered sweating in other areas of the body may occur.

RESULTS:

- Results vary from person to person. You may decide that additional treatments are necessary to achieve your desired outcome. Although highly unlikely, it is possible that you will not experience any noticeable result from the procedure.
